How to Change Language Settings

FarmCommand's interface language can be changed using the language settings panel.

 English (US) [United States]

 English (CA) [Canada]

 English (AU) [Australia]

 Français [France]

 Español [Spain]

 pyccKЛИB [Russia]

 Portugûes [Brazil]

1. Click **Main Menu**,  to open your user panel.
2. Click the current flag under your name to open the flag list.
3. Click the flag for your language and/or location.

NOTE: Though most of the interface buttons and menus are translated, many retain their default English names.

How to Change Your Password

1. You can manually change your password at anytime.
2. Click **Main Menu**,  to open your user panel.
3. Click the **Key**  to open the change password panel.
4. Provide your current password and enter a new one.
5. Re-enter your new password.
6. Click **Submit** to save your changes.

How to Change Unit Settings

Manage the unit settings for your farm from the Dashboard screen.

1. Click **Main Menu**,  to open your user panel.
2. Click the **Settings**  in the panel to open the **Settings** screen.
3. Scroll through the selection or use the menu in the top right-hand corner to jump to that settings group.
4. Manage your settings by checking radio buttons or selecting from the many drop-down lists.
5. The changes are automatically implemented when you exit **Settings**.

NOTE: By default, the **Tools > Disable measuring tool** is not selected and the **Measurement**  icon is visible on maps. Check the box if you won't be taking measurements.
