

GETTING STARTED
Quick Reference Guide

FIELDS

FIELDS

The **Fields Manager** is where you manage all aspects of your fields. The screen will be empty when you first login and you will not be able to use most of the functionality of FarmCommand® until you add your field(s) to the system.

Fields Toolbar

The **Fields** toolbar in the top-right corner of the Fields screen allows you to create and manage your fields.

Draw field borders

Upload shapefile (.shp, .shx, or .dbf) borders for your field

Lock the field borders in order to begin Farmers Edge service

NOTE: Once you've locked the borders you will no longer be able to edit the field borders without assistance from the Farmers Edge Support team. Locking field borders is required to begin Farmers Edge service on your fields.

Add a field to your assets

Edit the field information

Delete the field from your assets

How to Create a Field

1. Open **Fields** manager.
2. Click **Add (+)**. The screen refreshes to display a form for your field's information.
3. Enter data, select from the drop-down lists, or select relevant radio buttons.

NOTE: Mandatory fields are marked with an asterisk (*).

4. Add the required information to complete the form. The content can be edited later if you are unsure of the some of the data.
5. Click **Save**.

The field is created and now appears in the **Fields Manager** list.

The screenshot shows the 'Fields' form in FarmCommand. The field name is 'Chapel Park' and the legal land description is '12-32-24-1-W6'. The form is divided into several sections: 'Crops' with dropdowns for Previous Crop (Grass, Native), Previous Variety (unknown), Crop (Canola, Winter), Variety (Multiple), and Yield Target (100 kg/ha); 'Seeding' with fields for Seeding Date (Dec 21 2017), Seeding Depth (1.00 cm), Seeding Rate (25.00 g/m2), Row Spacing (1.00 m), and Plant Population (2 ea/m2); 'Owned' with radio buttons for Owned, Rented (selected), and Unknown; 'Tillage' with radio buttons for Zero - Till (selected), Minimum - Till, and Conventional - Till; and 'Other' with checkboxes for Irrigated (checked), Straw Removed, Continuous cropping, Tile Drained, and DSM Required. At the bottom are 'SAVE' and 'CANCEL' buttons.

How to Draw Field Borders

1. Select your field in the **Fields Manager**.
2. Click **Draw Field Borders** (🗺️). A map displays with the Drawing toolbar visible on the right edge of the screen.
3. Click-and-drag the map to find your field.
4. Zoom in on your field to fill the screen. Or use the City, Lat/Long or LLD search on the Map. The larger the field's image, the easier for you to draw its borders.
5. Use the tools to create your borders.
6. Finish and save your borders.

NOTE: Greyed out buttons are inactive.

Drawing Toolbar

The toolbar is split into two groups. The top group are the general tools for managing a drawn border. The bottom group provides additional tools to manage fields.

NOTE: If you've made a mistake or deleted a border by mistake, click Cancel to exit the Drawing Tools. You will lose all active changes.

Top Group:

Icon	Hidden Icon	Name	Description and Steps for
		Change a Setting	Open Settings sub-toolbar. 1. Click to open Settings bar.
		Vertex Snapping	Points of adjacent shapes share the same grid position while maintaining their individual placement; moving one point does not affect the other point. NOTE: Active and on by default.
		Topology	Points of adjacent shapes connect and merge into a single point. Once connected, the points move as one. NOTE: Active and on by default.
		Finish	Save your recent border drawing. Click to finish your recently drawn border. OR Double-click the last drawn point or in the center of the polygon to finish the border. NOTE: If you intend to draw a number of borders around different areas, you need to Finish each border before you can create the next one.
		Redo	Redo last action. 1. Click to repeat your last action.
		Undo	Undo last action. 1. Click to undo your last action.
		Cancel	Cancel all actions just completed.

Bottom Group:

Icon	Hidden Icon	Name	Description
		Select a Draw Geometry	Open the Draw Geometry sub-toolbar. 1. Click to open Draw Geometry toolbar.
